

tramada® Connect Wholesale

Only on tramada®...

Designed to deliver consultant productivity through simplicity and automation, tramada® bridges the gap between CalypsoNet and fragmented booking workflows.

Consultant Productivity

At Tramada Systems we recognise that successful travel agents require the flexibility to source the most valuable travel solutions for your customers from many content providers. By forming an integration between tramada® and CalypsoNet we have bridged the gap between wholesale suppliers and travel agents.

As part of the tramada® offering, travel agents now have an extensive range of products available at your fingertips which flows seamlessly into your tramada® database. Itinerary segments and costing information can now be immediately sourced from CalypsoNet and delivered to customers using existing booking workflows.

CalypsoNet is a travel agent focused online sales and booking management application which allows travel agents to make reservations with travel wholesalers who use the Calypso Travel System. CalypsoNet provides travel agents with access to wholesalers quickly and effortlessly with just one central login which empowers travel agents with a powerful and effective sales tool.

Travel agents can use CalypsoNet for end-to-end or part booking management including online payment and checking booking confirmation notices. Travel documentation can also be requested through the application which creates a comprehensive booking experience for travel agents and their customers alike. For more information please contact sales@tramada.com

Seamless Management of CalypsoNet Bookings

- Access to a range of products from multiple wholesale providers
- Seamless download of CalypsoNet itinerary and costings to tramada®
- Capitalise on the automation to deliver tangible time savings

Smarter Workflows
